### Integrated Overall Kinematics

The following integrated overall kinematics are presented:

1. $\mathcal{A}_C \cos (0) (\phi)$
2. $\mathcal{A}_C \cos (\phi)$
3. $\mathcal{A}_C \cos (\phi)$
4. $\mathcal{A}_C \cos (3) (\phi)$

The data are shown for the years 2006-2007. The plots indicate the fraction of associated events as a function of $-t$ and $x_B$. The $Q^2$ scale is also shown for reference.
