The figure shows multiplicity distributions for proton, $\pi^+$, $\pi^-$, $K^+$, and $K^-$ mesons. The data points are represented by circles, and the lines correspond to different models:

- **proton**
- **$\pi^+$**
- **$\pi^-$**
- **$K^+$**
- **$K^-$**

The models include:

- **CTEQ6L/DSS**
- **CTEQ6L/HKNS**
- **CTEQ6L/Kretzer**
- **HERMES LEPTO/JETSET**

The graphs illustrate the predicted multiplicity distributions compared to experimental data.
